[It is not quite clear who William Playters, the ward, was. It appears from the pedigree of Playters, in *Suckling's History of Suffolk*, vol. i, p. 86, that William Playters, Esq., of Sotterley, married to his fourth wife Mary, daughter and heir of William Drake, and had issue by her two sons and one daughter: 1, Drake William Playters, described as heir to his mother; 2, William, ob. s.p.; and 3, Alice, married to Anthony Payne. So far we learn from Suckling. Mary Drake was co-heiress of William Drake, Esq., of Hardley, in Norfolk, and carried the manor of Hardley to her husband, William Playters, Esq., of Sotterley. William Playters died and was buried at Sotterley, as appears from the following entry in the Register:—"1584, Willyam Playters esquier buried y^e xij of June." This was two years after the birth of his son *Drake William*, whose baptism is thus recorded in the Sotterley Registers:—"1582, Drake Will'm Playters, baptized y^e xxvj of December."† In 1600, the date of the grant of wardship, he would be in his 18th year. He appears to have inherited Hardley, where he was buried in 1632, and his shield of thirteen quarterings, with inscription underneath, is still to be seen in Hardley church. Can William, the ward, be the same as the William of the pedigree, who died s.p.? If so, he was probably an elder brother of Drake William, but there is no entry of his baptism or burial in the Sotterley Registers, and those of Hardley are lost.—ED. *East Anglian.*]

* "To make a tenure of knight-service, it was necessary that the tenement in point of quantity should amount to twelve ploughlands, which was called a knight's fee *feodum militare*; and the value of which is stated in 1 Edw. II, at £20 per annum. And he who held this proportion of land (or a whole fee) by knight-service, was bound to attend his lord to the wars for forty days in every year, if called upon; if he held only half a knight's fee, he was only bound to attend twenty days, and so in proportion." *Blackstone*, vol. i, p. 186.

And he that was his partner then was Alexander Jacklin.

The inscriptions on this peal are not correctly given by Blomefield, nor by Mr. Lukis. The 4th bell is from Dobson's foundry at Downham. The 3rd and 5th are by Tobie Norris, of Stamford, whose initials appear on the 3rd. A fleur-de-lis on the 3rd is also found on the 3rd at Chesterton, and the initial crosses on the 5th and on the 3rd at Chesterton are identical. I took full dimensions of the 3rd (a very poor bell), which I may as well give here:—Perpendicular height from lip to crown, 26 $\frac{1}{2}$ inches. Perpendicular height from lip to shoulder, 22 $\frac{1}{4}$ inches. Diameter, 33 $\frac{1}{4}$ inches. Circumference round inscription, 56 $\frac{1}{2}$ inches.

Edward III, and thereby became possessed of the manor of West Barsham. The paper is illustrated by woodcuts of arms and monumental slabs, &c.

Encroachments of the Sea on the East Anglian Coast.—The Rev. Joseph Gunn, of Irstead, communicates to the *Athenaeum* some notes and observations of encroachments of the sea on the coasts of Norfolk. Within the past thirty-five years, four coal-yards successively, a small farm-house with a barn, outhouses and garden, measuring at least 90 yards to the present cliff, have been washed away, and vessels can now sail at high water where the land was once cultivated. Beyond Cromer, several chalk pinnacles, enveloped in the glacial beds figured by Sir C. Lyell in his *Elements of Geology*, are either entirely removed, or so reduced as to be scarcely recognizable. At Cromer, the old lighthouse, bearing the Ordnance Bench mark, and noted in the survey as the highest spot in Norfolk, 248 feet 10 inches, was, last December, precipitated to the beach, and has since been entirely washed away. At Eccles, the tower of the old church, till lately enveloped in the Marram Hills, now stands upon the beach, occasionally surrounded by waves. These are a few instances noted by Mr. Gunn. The explanation is, that high seas, aided by landsprings, wash away the loose sandy or chalky foundations of the cliffs, and thus undermine them.
